HONORS ENHANCED COURSE

STUDENT/FACULTY CONTRACT

Student Name: ___________________________ Student ID Number: _______________________

Course Name, Number & Section: ______________________________________________________

Instructor Name: ________________________ Semester: _________________________________

The “honors-enhanced in one’s major” course description, as approved by the Honors Faculty Advisory Board, is as follows:

*By the end of this ‘honors-enhanced in one’s major’ course, the student will have gained skills and/or information that otherwise would not have been gained. Instead of simply assigning additional work, instructors are encouraged to implement alternative ways of learning to fulfill the honors-enhanced component. In either case, the enhancement should be specifically crafted to help prepare the student to be able to carry out a year-long, original research project via the Honors Thesis.*

Please describe in detail how the enhancements made in this course for the above-named student will fulfill the course description. Be sure to include a precise description of how these enhancements will affect the student’s grade. Attach additional pages if necessary. (NB: If this is enhancement is not in the student’s major but is, instead, one of those very rare instances (approved ahead of time in writing by the director of the honors program) of a course being enhanced to fulfill an honors general education requirement, the last sentence of the description is not directly relevant. In this case, reference should instead be made to how the enhancement fulfills the description of a general education honors course, the description of which can be found on the honors website.)
