Course Description

This two-day (16 hours) course is designed for uniformed police officers, detectives, criminal analysts, probation officers, and parole officers. There is a strong emphasis on the technology skills needed to conduct investigations. Those skills include tracking online communication and using online social networking portals (MySpace, Facebook, Twitter, etc.) as investigative and analytical tools. Beginner and experienced students will identify information available on various sites and explore the currently overlooked and underutilized value of integrating that information into criminal investigations and criminal intelligence analysis.
