RESEARCH/SCHOLARSHIP INTERESTS:

My primary research interests involve analyzing various organizational aspects such as innovation diffusion, legitimacy and isomorphism within the sport industry. My preferred context is through the sport of football at the NCAA Division I Football Bowl Subdivision (FBS) competition level. Most of my work reviews these institutional theory concepts through the development of college football stadiums throughout history. My historical research focuses on using heuristic devices such as ideal-types to explain organizational phenomena.

DISSERTATION

An Ideal-type through Innovation Diffusion: Recording the Construction History of Football Stadiums in the National Collegiate Athletic Association Division I Football Bowl Subdivision (FBS)
