School Psychology Comments 2018-19

I wish I learned more about 504 plans and there was a chance to use IEP direct

I wish we learned more about the results of psych testing. We were taught to interpret them, but what does that mean for their strengths and weaknesses and how they learn best? This was taught in a course, but I spent a lot of time post grad doing more research on this topic.

Provide more race-related training.

More in person hands on experience! Less online coursework. It's easier in the short term but I think effects the quality of education for the long term. I feel as though my in person classes with hands on learning and discussion were more beneficial than the ones I rushed through online.

2016-17 Comments

I felt very prepared and NU was an excellent program. I just felt a bit lost during the interview process. I think it would be really cool to do mock interviews... we may have actually done this and I can't remember. Either way, a little bit more emphasis on that would be beneficial!

2017-18 Comments

The school psychology program should have more than one full time professor connected to the program. Dr. Kilanowski is amazing and does a wonderful job, but the program would be much more consistent if another full time faculty member were also a part of the school psychology department.
