2017-18 Comments

I think I was very well prepared. I was hired as an assistant principal and promoted to principal two years later. As a single parent working two jobs, seven days a week, it was amazing to have the online option. I wouldn't have been able to complete the program otherwise. More knowledge about leadership skills beyond the school building .

my experience was very positive

The programs at NU prepared me for my roles in education.

I adore the fixation I received. I can’t think of anything that could have been done better.

Many class conversations were focused solely on the role of Superintendents, so acknowledging other roles in which the SDL is required and allowing us to hear from professionals in a variety of other roles would have added to our experience, particularly for those of us who were not intending to take on Superintendent jobs.

I thoroughly enjoyed my experience, loved my professors, and have deeply connected my work. I would love to engage again someday!

Within the SDL program many Professors pushed the Superintendent track as the only reason to be in the program. Many people starting out do not know where they are going to land and many already have a plan that does not include becoming a Superintendent. I found this off-putting, that my path was not good enough for them.

2021-22

More real life like opportunities that are often found while on the job.

More content on information needing to be submitted to the state as well as a more in depth curriculum with budgeting

Provide additional work that relates to real-life scenarios

No- my experience was fantastic.

2022-23

- More project based experiences and simulations
- It was a wonderful program.. nothing more
- I am already working as a school principal but my Masters degree hangs in my office to show my students that learning continues to happen for everyone including me!
- More training (any training) on how special teachers serve the district. Librarians, Ed tech, physical education all have different impacts
